Royal Electric
1250 Memory Lane North
Columbus, OH 43209

Dear Susan and Ron,

I am writing to thank you for the outstanding electrical and energy management installation project you delivered to Burns & McDonnell at the Port Columbus International Airport. We needed a subcontractor who would pay close attention to detail and who would be able to perform the extensive electrical system modifications we needed in order to implement our innovative electrical energy savings measures.

Your work on this project is no small achievement, and it significantly aided the progress of the overall project.

It has been a pleasure working with you and your staff on this project. Our client is extremely impressed with both the quality and timeliness of this project. We look forward to working with Royal Electric on future projects.

Very truly yours,

BURNS & MCDONNELL
