Executive Director

Dear Greg and Susan,

I just wanted to take a brief moment to thank you for the fine work your company has done here at Port Columbus International Airport this year . The recent completion of the America West Ambassadors Club and the Brooks Brothers Mens Clothiers made a nice finish to go along with the other restaurants, tenant buildouts and Port Authority projects completed this year . As usual, your field technicians, foreman and front office staff made my job as project coordinator much easier due to their expertise and professionalism . Your field people truly understand the complexities and logistics involved with working at a facility that is open twenty four seven. My tenants, passengers and administration staff continuously give high marks to your companies performance. I am looking forward to working with Ron, Lloyd and the rest of the Royal team in the near future.

Sincerely,

Robert E. Kibler

Construction Project Coordinator
Port Columbus International Airport
