

INTERSPACE
Airport Advertising

March 1, 2006

Susan Ernst
President
Royal Electric Construction Corp.
1250 Memory Lane
Columbus, OH 43209

Dear Susan:

I am writing to thank you for the outstanding installation project you delivered to Interspace Airport Advertising at the Port Columbus International Airport. When Interspace was submitting a proposal to the Airport in 2003, we located your DBE Certified firm as a part of our outreach and mentoring efforts. To date, we still work with Royal at the Airport.

Our relationship with Royal has been rewarding. You have helped us provide and install signage that affords the traveler a valuable Airport experience. The "crew" at Royal was more than helpful in getting Interspace started at the Airport. We knew from the beginning that the Royal's experience matched our needs, but we had no idea how well our organizations would work together on the project. The result? An ACI award-winning program that the Airport is proud to show off to the industry.

I wanted to take this opportunity to thank you and to share our success story with you. We extend our gratitude to you for taking part in our outreach efforts with DBE firms like yourself. Whenever our signage needs involve electrical or teledata wiring in the central Ohio area, we will not hesitate to call on your firm.

Sincerely,

Marianne Lieberman
President
Interspace Airport Advertising
