Columbus, Ohio 43209

Greg,

I would like to compliment you and your staff for the excellent job that was done during the preliminary planning and the extensive occupancy testing recently completed at the Buckeye Data Center in Powell, Ohio.

As a Fire Chief, my inspectors find that working with companies that anticipate and prepare for final inspections can sometimes be a challenge. A project of this size and number of devices, can create an even larger challenge. Lt. Mirise commented that your company and employees were very competent and well prepared for this testing phase.

I sincerely appreciate your preparedness and look forward to working with you and your staff in future projects.

Sincerely,

John Bernans
Fire Chief
