SimplexGrinnell

January 3, 2007

To Whom It May Concern:

As the fire alarm system provider for Project Buckeye, SimplexGrinnell would like to extend our thanks to Royal Electric Construction Corp. for their design assistance over the last six months.

We place a great amount of emphasis on our relationship with the system installer to insure that a comprehensive system is installed correctly and on-time. On this particular project. we divided responsibilities to review all drawings thoroughly (HVAC, sprinkler, electrical) and discuss all possible solutions. This process resulted in a comprehensive fire alarm system for the customer.

Based upon past experiences with Royal Electric as one of our systems installers, this project will provide additional cost savings by using a less-costly wiring solution that also results in less trouble-shooting for ground faults. In addition, we feel confident that the installation by Royal Electric will assist SimplexGrinnell in staying within our technical support budget.

Respectfully submitted,

Tom Berry
