To Whom It May Concern,

I recently had the pleasure of working with Royal Electric in Columbus, Ohio, during the Construction and Commissioning of a Data Center for a major telecommunications company.

In my capacity as Commissioning Agent, the success of every Data Center project relies most heavily on the Electrical Contractor. The quality of the contractor's work and his services during Commissioning are key elements of a quality finished product. Of the 20+ projects of this type that I have done, I can honestly say that Royal Electric, led by Dave Fetters, has been the best in all regards. They have my highest recommendation.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "John H. Johnson", with a long horizontal line extending to the right.
